Absent: none

Date: 8/28/14

Location: Library

Start Time: 1045 am

End Time: 1120 am

Everyone is okay with roles that they were assigned

SPP - software developers

Feasibility report - testers (Evan)

Using hub to store our project online so everyone can access it

Started working on WBS

Going to email tan tonight about to meeting on tuesday everyone

Reply all that they can make it

Everyone excited for project? Seems pretty cool

Excited to meet with tan to discuss what we actually are doing

All roles already have appointed tasks by tan - flexible

i like the idea of working together on this so we can all know how

Internship talk

cms or csm do you want to use that or do you want to use visual studio and upload it (to developers)

We're going to use visual studio

This is further down the line documentation for the developers

Do we have to use doxygen? (upload online)

Questions concerns email email email

Continue the email chain for organization

WBS is due tomorrow

No class meeting on Tuesday

Bring some good questions for tan on tuesday
